

I CAN GROW MY OWN BEANS!

WHAT TO DO:

- 1) Use an empty egg shell
- 2) Fill it with some soil from the garden
- 3) Put a kidney bean in the soil
- 4) Keep watering it every day until you see it sprouting
- 5) When it's big enough, crack the shell gently and plant it in a bigger pot
- 6) Keep it inside and let it grow big enough to grow some pods!
