# CENSA Coffee Beans – Dark Roast

At the beginning of 2020, SPAR International introduced CENSA – a premium Coffee Concept. This **SPAR Exclusive Brand** is available in three formats, including self-service and a barista operated café in two different sizes.

To complement the concept, SPAR International has created a unique **CENSA Coffee Blend** following an extensive sourcing and selection process for the **finest coffee beans**. SPAR CENSA Dark Roast coffee beans are **slow roasted, 100% organic** and **Rainforest Alliance certified**. The blend features **tones of red fruit with a hint of toffee**, creating a delicious, full-bodied taste experience.

The dark roast is available for both **instore brewing** as well as a **consumer retail pack**. More roast varieties and limited editions are under continuous development.

CENSA branded sugar sticks are available exclusively for the instore café concepts. Sugar sticks are integral to any coffee offering and provide extra CENSA branding.
